ZSK technical News and Innovations

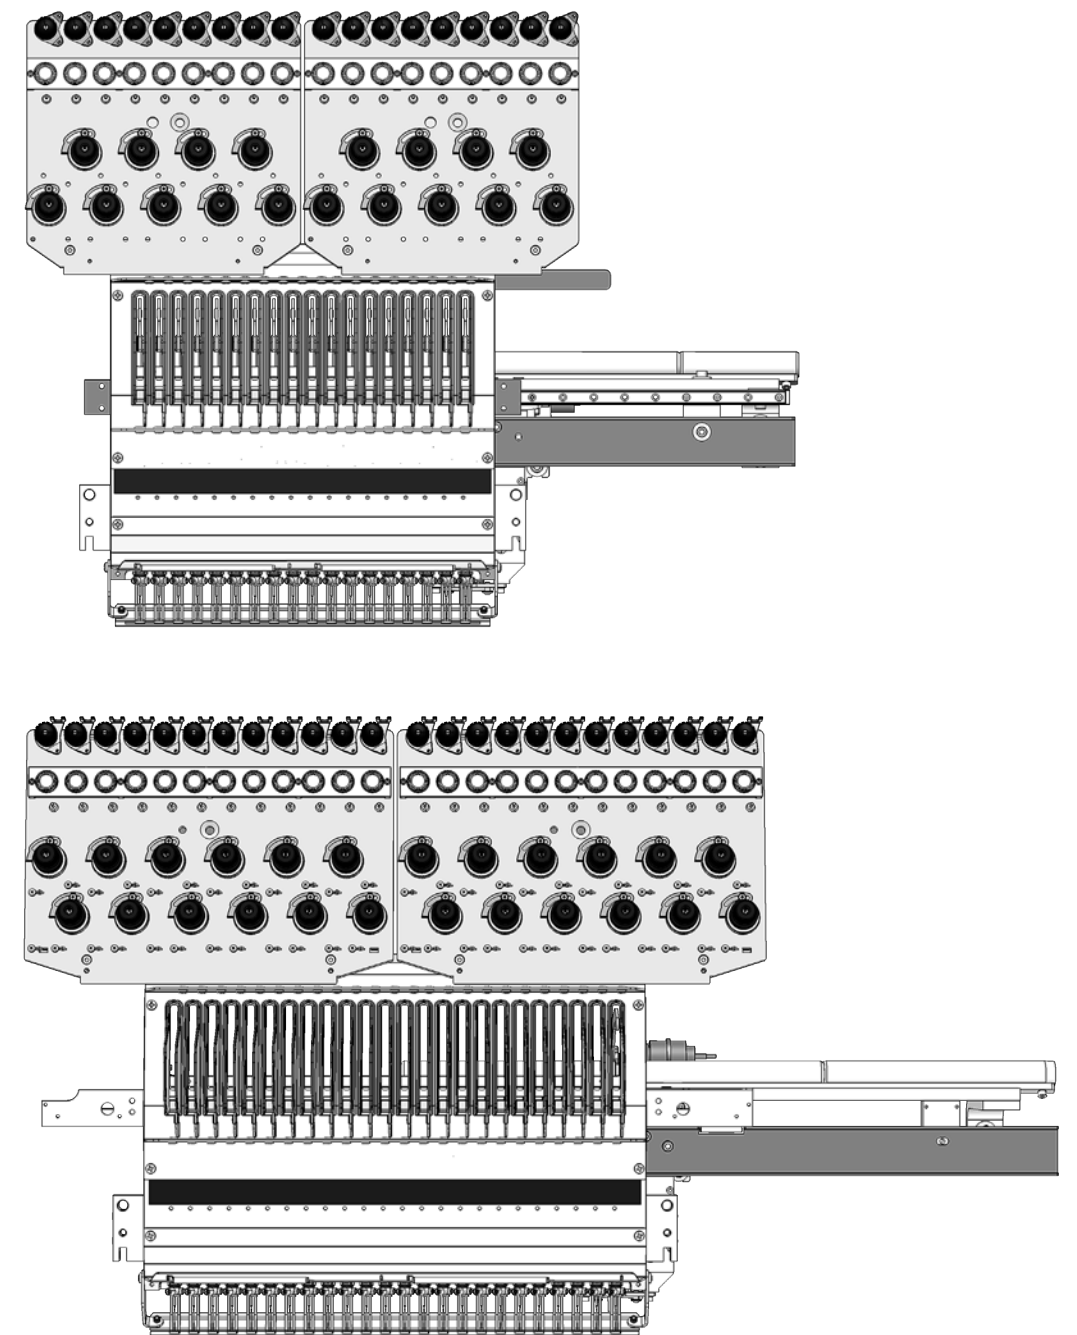

Heavy duty border frame clamps

The developed clamps can be adjusted to variable material thicknesses and are therefore suitable especially for thick materials or multi-layer materials. Moreover, normal materials can be clamped with particularly high tension. The clamps are available in 200mm and 300mm.

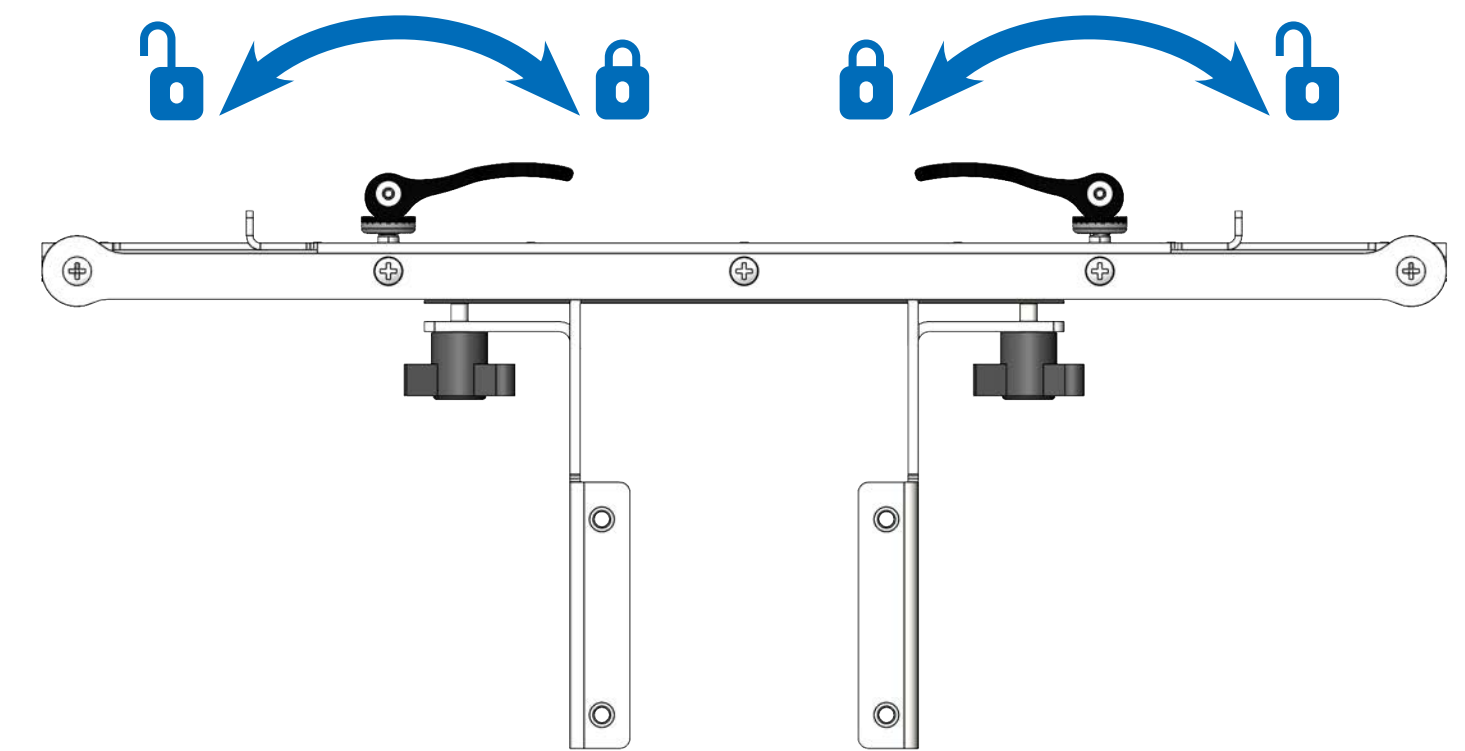

Border frame clamps with deflectors

The new clamps are designed for use on machines with W-head. The deflectors prevent the feeding from getting caught on the frame clamps. The clamps are available in 200mm and 300mm.

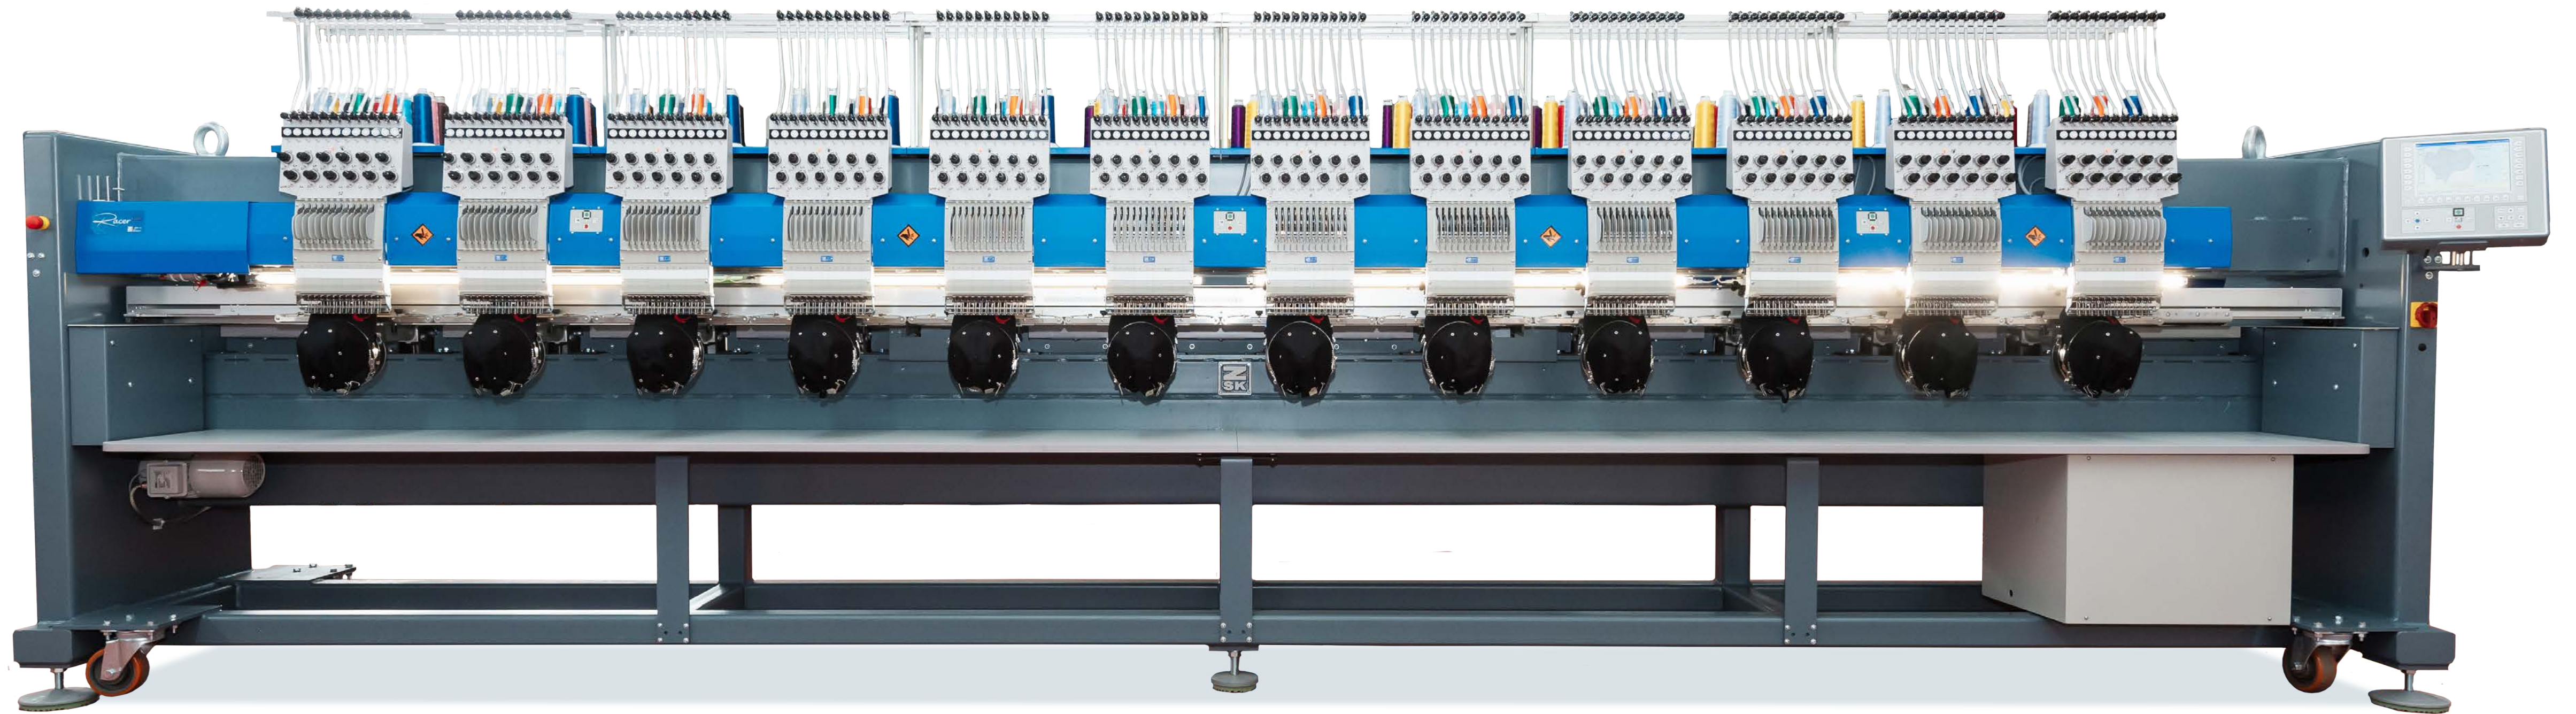

Flatbed machines with 18 and 24 needles

While the flatbed machines were previously available with a maximum of 12 needles / colours, we can now also offer our customers flatbed machines with 18 and 24 needles / colours.

Quick Change System Sprint 8

The Sprint 8's new Quick Change System enables the quick and easy change between different applications such as cap, tubular applications or border frame.

up to **12**

components at the same time

Racer 12 S

- 12 heads with 12 needles
- up to 1000rpm
- super fast colour change
- slimmest tubular arm
- cap and single frame embroidery
- ideal for 3D embroidery
